Additional information

1. Unless stated otherwise, data are derived from the latest National Apprentice and Trainee Collection (no. 121, September 2024 estimates), which is compiled under the Australian Vocational Education and Training Management Information Statistical Standard (AVETMISS) for Apprentice and Trainee Collection Specifications, Release 7.0, October 2015.
2. Due to the delay in time between an event (commencement, completion, etc.) occurring and the reporting of that event to NCVER, NCVER estimates the most recent figures. The estimation method involves weighting recently processed numbers based on average reporting lags. As estimates are revised for up to seven quarters, figures for the last two years may differ from those published in earlier or subsequent reports. The final counts are those submitted by jurisdictions. Further details on the methodology can be found in the Estimation of apprentice and trainee statistics technical paper.
3. The COVID-19 pandemic in Australia brought about significant uncertainty for individuals, businesses, and governments. The resulting suspension of normal economic activities, combined with various government and economic interventions, has impacted apprentice and trainee numbers. Therefore, caution should be exercised when interpreting and comparing data from 2020 onwards.
4. **In-training** figures represent the number of apprenticeship and traineeship training contracts where the apprentice or trainee is actively training under the terms of their contract, and who have not completed, cancelled or withdrawn from their training, or had their training contract expired. The figure reflects the number of active contracts at a given point in time (at the end of the quarter), and therefore in-training figures cannot be cumulated
